

## Q1 nomination at UBD Cleantech AB

During a formal meeting, UBD Cleantech AB have been nominated the Q1 status from it's prominent customer Ford Customer Service Division Europe, in Köln.

Achieving such nomination requires the whole company and it's employees efforts in manufacturing the right quality, the right quantity at the right time, all times declared Mr Dietrich Eggert STA engineer, at FCSD-E. A bronze plaque and a Q1 Flag is proudly handed over to Ola Jönsson, Quality and Environment Manager and Roland Johansson, Managing Director at UBD Cleantech AB.

The nomination has been achieved after signing a long term contract on supply of remanufactured Diesel Particulate Filters to Ford Europe and their aftermarket organisation. The process with cleaning DPF has been developed by UBD Cleantech and has created a huge interest from the European car manufactures. Environmentally it creates an enormous reduction of CO2 impact and this is what the car manufactures evaluates and appreciate.

"We will find a central place for this plaque where we daily is reminded of the obligations it includes" said Roland Johansson, MD "Continue supplying the customers needs and exceed their expectations, is the key to our future success".
